PROFESSIONAL EXPERIENCE

O'Pake Institute for Economic Development and Entrepreneurship, Lawrenceville NJ

Mar 2026 - Present

Graduate Fellow & Operations Lead

- Build & manage business incubator operations in Notion, tracking workflows & project milestones across 5-6 startup clients
- Consult with clients to audit digital presence and structure Go-to-Market strategies such as Google Search/video campaigns and digital media placements based on bid-to-budget constraints and industry verticals
- Direct a team of 10 undergraduate analysts, mentoring on market research & client scoping to create actionable project plans

Easy Event Planning, Remote

Jan 2024 - Jun 2024

Database Analyst & PM Intern

- Led team of 12 to deploy Python-based database scripts (VS Code) for high-volume Etsy/Amazon data integrations
- Doubled daily web traffic (10,000 to 20,000) within 4 months through SEO modeling & keyword research matrices
- Developed a foundation in digital advertising mechanics by analyzing Google Search ad structures & Standard Shopping configurations to track multi-channel marketing ROI

Santech Solutions Inc., Princeton NJ

Sep 2023 - May 2025

Operations & Business Development Intern

- Conducted advanced market analysis on 500+ companies to identify expansion paths and untapped business prospects
- Performed sales pitches/presentations to prospective investors, communicating company value propositions and ROI
- Enhanced ETL protocols & data cleansing workflows, improving dataset accuracy by 40% to secure client/investor deliverables
- Managed CRM workflows and KPI dashboards, utilizing data insights to increase outreach efficiency by 50%

Administrative & Business Analyst Intern

Jun 2021 - Aug 2023

- Designed foundational data structures that increased user-data confidence and reduced platform search errors by 40%
- Reconciled A/R and A/P workflows, P&Ls, and expense reports with 95%+ accuracy across multiple reporting cycles

PROJECTS

Clinical Decision Support & Operations, RWJ University Hospital Somerset

Sep 2025 - Present

- Built Python pipelines to merge, clean, and engineer features across 6 EMR datasets (2,473 records; 302 patients), enabling multivariate analysis to identify drivers of interpreter utilization and readmissions
- Applied regression and sensitivity analyses to identify operational drivers of patient outcomes, supporting a hospital leadership's recommendation for a professional interpreter discharge protocol
- Developed a Python-based AI governance pipeline to validate LLM-generated clinical summaries using evidence verification, semantic risk assessment, and rule-based decision routing

Program Impact Evaluation, Share My Meals

Sep 2025 - Present

- Conducted longitudinal analysis to evaluate program effectiveness across multiple participant cohorts, translating statistical models into executive-ready business narratives for nonprofit leadership
- Advised on a major operational pivot from a home-delivery model to a scalable partner-distribution model, improving future resource allocation and evaluation frameworks
